Results for the routine sampling event 220

Sampling was conducted on Tuesday 11 March 2008 and Wednesday 12 March

- *Rhizosolenia cf chunii* was detected in very low numbers at Dromana and Mount Martha.
- *Pseudo-nitzschia* spp. was detected at Dromana, Mount Martha, Clifton Springs, Grassy Point and Pinnacle Channel, but in very low numbers only.
- Routine sampling at Flinders was delayed due to sampling equipment failure and will now be completed on 17 March 2008.

Results are below the trigger levels, and no action is required.

Seawater temperature at the Aquaculture Fisheries Reserves:

	This week	Two weeks ago
Clifton Springs	20	NA
Grassy Point	20	NA
Dromana	20	NA
Flinders	NA	NA
Pinnacle Channel	20	NA
Mount Martha	19	19

Note: These are surface temperatures taken at one point in time and should only be used as an indicator of gross temperature changes.
